Completed the tasks which have been given for today.

- Developer Console Basics
- Command-Line Interface
- Find and Fix Bugs with Apex Replay Debugger

The screenshot shows the Trailhead interface for the 'Command-Line Interface' module. The top navigation bar includes the Trailhead logo and links for 'Today', 'Learn', 'Credentials', 'Community', 'Help', and 'More'. The module title 'Command-Line Interface' is displayed, along with a description: 'Learn the basics of working with a command-line interface tool.' Below the title are three icons: a star, a plus sign, and a document. A progress indicator shows 'Completed 7/23/23'. A list of three tasks is shown, each with a green checkmark indicating completion:

Task	Duration	Status
Learn About the Command-Line Interface	~20 mins	Completed
Explore Command Structure and Navigation	~20 mins	Completed
Set Up Command-Line Tools	~20 mins	Completed

At the bottom, there is a purple circular icon with a white terminal symbol and a green checkmark, indicating the module is complete. A '+300 POINTS' badge is visible in the top right corner.

Project

+400 POINTS

## Find and Fix Bugs with Apex Replay Debugger

Replay debug logs in Visual Studio Code to discover the root cause of errors in your code.

Completed 7/24/23
